We are proud to send you our catalogs and sincerely hope that you enjoy them.

## There Is Something About A Lily Pool That Makes The Rest Of Garden Seem Commonplace

The principal value of aquatic gardening is as an enduring hobby—its purpose to offset the more serious side of life by bringing joy, happiness and relaxation.

Did you ever notice how much better you do a job when you're calm, relaxed, unworried?

A pool involves LITTLE space, LITTLE expense and LITTLE time or attention. Yet nothing else gives quite so much for so little. Aquatic life is fascinating—fishes glide through the depths, dragon-flies skim above, green pads unfold and waxey blossoms sparkle in the sunlight. The mystic lotus rises, breathing the lure of far away land.

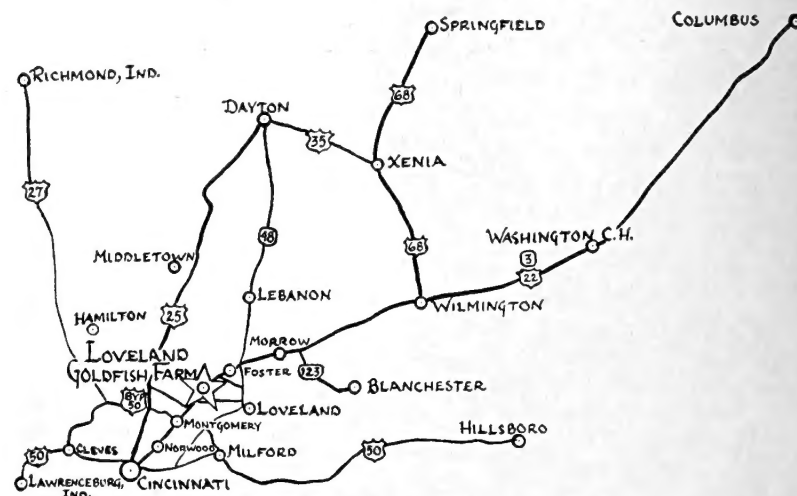

Today we have a great need—for the comfort and solace which only Nature can provide—and we must be thankful that aquatic Plant Life is still abundant.

### NOW IS THE TIME TO BUILD A LILY POOL!

Materials are more plentiful and easier to obtain. The whole family can go into a huddle as to where the pool will be best built, and with a little cement work, you can have your water garden.

Build your pool NOW! Beside the benefit of healthful outdoor work, a Lily Pool will provide many hours of relaxation and pleasure, will make your garden more beautiful—now and for years to come.

If you would like one of these Catalogs sent to your friends—all you have to do is jot their name and address on a postal card and send it to us. We will be glad to send it to them immediately; or anytime you misplace your Catalog, let us know and we will send you another.

SUNRISE

# HARDY WATER LILIES

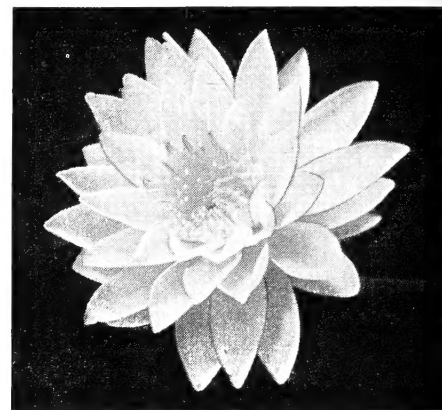

*Bloom and Beauty Year After Year*

**GLORIOSA.** One of those Lilies with an abundance of "It." It has no equal for blooming. No pool is complete without this beautiful red Lily. **\$3.50**

**COMANCHE.** This is our choice of a sunset color Lily for a large pool. It has all one could ask for a Lily. It begins to bloom very early in the spring and we have seen it in bloom until ice forms in the ponds in winter. The color is a rich apricot, then changing to a deep bronze. **\$3.50**

**SUNRISE.** The biggest and best of them all. Looks like huge yellow suns floating among leaves that are beautifully marked with brown spots. The flowers are graceful in form, of glorious canary color. A Lily that should be in every water garden. **\$3.50**

**AMABILIS.** A new variety that is a beauty. So different in form and bloom that we recommend it as something really worth while. It's in a class by itself. In color it is a bright silver-pink and its blooms easily average 7 inches in diameter. **\$3.50 each.**

**Gonnere—large double white flowers**  
**GONNERE.** The greatest and finest of white Lilies. Each blossom is a perfect globe. This variety is double clear to the center. Snowy whiteness of color. In our opinion it is one of the most attractive Lilies in our garden. **\$3.50 each**

## Moisture Loving Plants

**FOR SOIL-LESS GARDENING**—A modern idea—a companion thought to the ever popular dish garden. Style your SOIL-LESS garden to harmonize with the interior of today's functional living room. All you need to create an interesting scene is a container that will hold water and plants. Fashion it to suit your own fancy using drift wood, or cork bark, highly colored rocks, Leichens or sheet moss. Top it off with a colorful miniature figure or dish garden ornament—finish it with colored sand.

The dryness of the "winterized" home of today is moistureized by the evaporating water in your "Water Garden"—this natural humidifying process is not only conducive to our own well being, it keeps our plants greener and fresher looking.

**ALL OF THESE MOISTURE LOVING PLANTS WILL GROW OUT DOORS, AROUND THE POOL, OR IN SHALLOW WATER IN THE POOL.**

All of these plants can be grown in the shade without direct sunlight—  
All can be grown in soil or in water—All require moisture to grow.

## These **WATER PLANTS** provide the finishing touch to the perfectly balanced garden . . .

**H**ERE are grouped those plants which grow in the water. They are varied and interesting, and give the much desired natural effect to the pool. They are easily grown. Most of them do best in shallow water and so the pots, boxes, or tubs should be raised to within two to eight inches of the surface.

These are wonderful possibilities with Water Plants to give your pool a unique and tropical appearance. Try a collection of Taro, Umbrella Palm, Papyrus and Primrose Willow, grouped together in a corner of the pool or in the center, or a collection of Primrose Willow, Parrot Feather and Forget-Me-Nots in a shallow corner of the pool.

For a natural pool use plenty of Japanese Iris planted right at the edge or in one to three inches of water. Our sturdy, healthy plants reach you ready to grow. If you have ever planted aquatics before you know the value of starting with good plants. Varieties marked with a (\*) are particularly adapted to a depth of 6 to 12 inches.

Varieties marked with a (†) are suitable to plant at about 2 to 6 inches.

Varieties marked with a (§) are plants that like wet feet but with crowns and stems preferring the air and sunlight.

Varieties marked with a (§) are the beautiful Tropical Plants.

**THE FOLLOWING PLANTS ARE PERENNIAL:** Water Iris, Japanese Iris, Cattails, Cardinal Lobelia, Floating Heart, Forget-me-nots, Pickeral Plants, Parrot Feather, Var. Sweet Flag, Primrose Creeper, Cellophane Plant, Flowering Rush, Arrowheads.

**PLANTS THAT GROW SIMILAR TO WATER LILIES:** Water Poppy, Water Snowflake, Floating Heart.

**PLANTS THAT VINE:** Floating Heart, Parrot Feather, Primrose Creeper, Morning Glory.

**201 †CATTAIL.** Swamp plant. Hardy. 2 for 35c.

**201A †GRACEFUL CATTAIL.** A tall variety with slender cattails. These plants furnish a very fine background in massed plantings. 2 for 50c.

**202 †FLOWERING RUSH.** A hardy plant with peculiar three-sided leaves. Pink flowers are borne on round stems. 35c each; 3 for \$1.00.

**203 †CARDINAL LOBELIA.** Another beautiful native plant. Spikes of rich, cardinal-red flowers. 35c each.

**204 †ARROWHEAD.** A hardy plant that is easily grown. When in bloom its white flowers are admired. Spreads rapidly. Beautiful shaped leaves. 25c each; 3 for 50c; \$1.50 dozen.

**205 †DOUBLE FLOWERING ARROWHEAD.** A hardy plant for shallow water. Big beautiful double flowers—borne on long stems. Each 50c; 3 for \$1.35.

**206 †VARIEGATED SWEET FLAG.** An old but worthwhile plant for the pool. Excellent for shallow water either in the pool or in a natural pond. Spreads rapidly and soon makes a wonderful display. Saber-like leaves, broadly striped green and ivory. 35c each.

**207 †§UMBRELLA PALM.** Sub-tropical. This interesting plant forms a clump of tall round stems surrounded with a cluster of expanded foliage that somewhat resembles an umbrella. It thrives in moist soil. It may also be grown as a house plant. 35c.

**208 †PRIMROSE WILLOW.** Erect plants 2 to 3 feet high with attractive narrow foliage and bright yellow blossoms. Very desirable at the edge of the pool or in tub gardens. 35c.

**209 †WATER MORNING GLORY.** This is something that IS NEW. It is a vining plant, grows to a length of 6 feet. Its blooms are huge cornets of glossy white, reaching a diameter of 6 inches. Beautiful beyond imagination, it should be included in your water garden. Excellent for solariums. 25c Each

LOTUS ARE SHIPPED FROM APRIL 15th TO JUNE 15th

# The Lotus...

There is something fascinating about a Lotus. Symbolic of purity under temptation, so the followers of Buddha have said.

In the Lotus we see beauty of form and harmony of color, great concave, shield-like leaves often 2 feet in diameter, large buds borne on long stems 4 to 8 feet tall, enormous flowers with delightful fragrance.

Lotus are perennial, coming up year after year. They should be planted in full sunlight at a depth of from 6 to 18 inches below water level in a container, which should be about 15 inches by 24 inches and at least 10 inches deep. Soil, a rich mixture of top soil and well rotted cow manure.

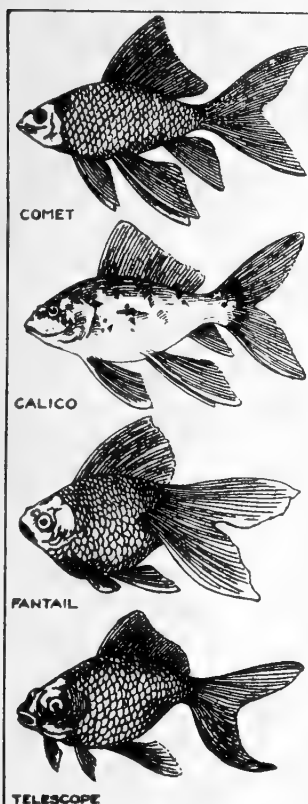

## CHINESE RED LOTUS - Colossal - Exotic - Supreme

The King of Lotus. Large full double flowers of bright rosy carmine carried well above the foliage. A gorgeous variety; magnificent in every respect. Can be grown in tub, small or large pool—natural lake—in pools provide a box containing at least 3 bushels of soil.

**\$4.50**

**SHIROMAN LOTUS**—Illustrated below—Big double blossoms of pure white color. Truly the Queen of Lotus—**Each \$4.50.**

# Goldfish . . .

## The Ideal Pool Fish

**N**O POOL—even if it is a miniature one—is complete without a few ornamental fishes. Fish in the pool will take care of themselves, only an occasional feeding of Dried Shrimp and Jo Jo Fish Foods is needed.

The illustrations show several different types. The illustrations are not exaggerated as is the case in many catalogs. You will be pleased with our selections.

Goldfish may be wintered outside in your pool, provided you have some soil and plants in it, and the depth is at least 18 inches. If you drain your pool, a tub or tank in the basement will answer.

## There Is Something About An Aquarium

A living picture—an aquarium fits in any room, unobtrusive to any color scheme or decor, demanding only a semi-permanent position on a table, bookcase, desk, aquarium stand, or built into a wall.

In your home, in the office or waiting room, and in the school, an aquarium provides an enduring and educational hobby that is fascinating to both young and old. Here is pleasure, beauty, and relaxation from observation of your finned pets; pleasure from which you will never tire. Here is nature at your elbow; in your aquarium, an ever changing panorama of undersea life and beauty. Vivid rainbow colored fish of odd shapes and sizes contrasted beautifully against the peaceful green background of graceful aquatic plants arranged to suit your aqua-scaping desires. Watch them live, watch them grow!

To those of you who have already discovered the pleasure, beauty, and relaxation of "Things Aquatic" our catalog may only be a price list and booklet of information. To those of you who have friends who own an aquarium that you have admired and aspired to own one like it, we hope that our catalog may be the key opening the door to hours and years of untold beauty and pleasure from an aquatic hobby in your own home.

## Why Things "Aquatic"

For years we have wondered at the lasting interest in keeping fish in the home. We have asked ourselves and our customers again and again why so many people have made their hobby "Things Aquatic." The answer lies not in a simple statement, but in several.

Young or old, an aquarium is enjoyed by everyone. Here is pleasure and a hobby you are never too old to enjoy, one that you will never tire of. Physicians point out that a man's hobby is an important means of complete mental diversion and physical relaxation. They encourage everyone to adopt a hobby.

For the adult an aquarium is a pleasant diversion from his working world, and as well, a striking decoration to any room. For the child there is real educational value in a hobby that will grow with him.

And remember too—"Things Aquatic" need not be expensive. We have listed in our complete catalog aquariums and equipment in all price ranges, to fit every budget. And be assured that all merchandise in our catalog is "Loveland Tested"—for quality and satisfaction.

## Successful Aquarium Management

Keeping fish in the home is simple and easy provided a few common sense rules are followed. In placing the aquarium of your choice, all that is required is a semi-permanent location away from chilling drafts or excessive heat. Good light, not necessarily sunlight, is essential to plant growth and a healthy aquarium. When setting up a new aquarium the gravel should be thoroughly washed and the water in the aquarium conditioned or aged before introducing the fish. Allow the water to stand at least 24 hours or use "Water Rite Tablets" for the purpose of eliminating chlorine and other water purifying chemicals which are harmful to fish.

Here are a few simple rules; if adhered to your troubles will be minimized and pleasure from your hobby increased and longer lasting.

1. Don't over feed—cloudy water—gravel turning black at the bottom from decaying, uneaten foods are positive danger signals. Don't ignore them. Overfeeding causes the water to become unfit for the fish to live in.

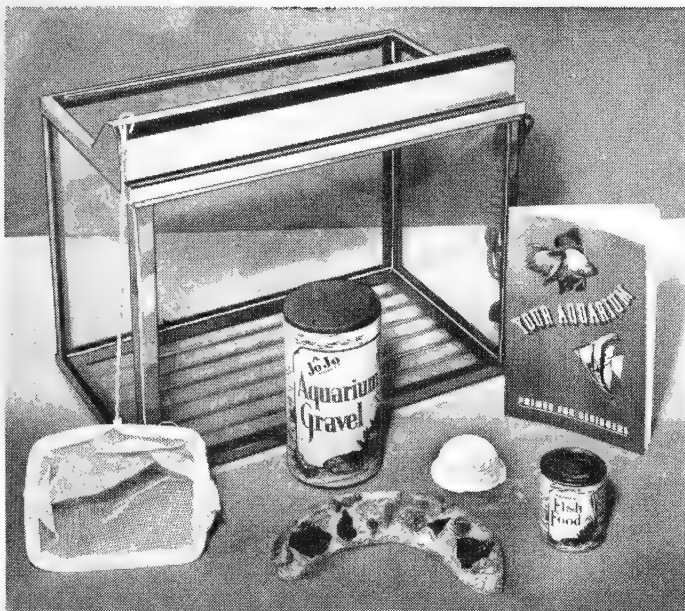

2. Don't overcrowd—too many fish use up the oxygen content of the water faster than it is replaced and cause the fish to

die. An easy rule to remember—two fish per gallon of water.

3. Avoid temperature changes—sudden drops in water temperature can be fatal to Tropicals. The best life insurance you can buy for your finny pets is a good heater and thermostat that will keep the water constantly between 74 and 76 degrees F.

4. Keep your aquarium clean—dirty aquariums in addition to being unsightly are unhealthy. The dirt and refuse which accumulates on the bottom of the aquarium should be siphoned off regularly and the sides of the glass cleaned with an aquarium scraper. Time spent cleaning the aquarium can be further minimized by using an air pump and filter. A filter will always keep the water pure and clean. When refilling the aquarium always use aged water or water made safe by Water Rite Tablets.

5. Always—when adding new fish to your collection, quarantine them in a separate aquarium for at least 48 hours. If they have been bruised or have become sick in transporting them to your home this quarantine period will enable you to discover whether or not your new fish are sick and you will be able to treat the disease without danger of contaminating your entire aquarium.

## A Balanced Aquarium is Well Planted

A "balanced aquarium" is one in which the air surface of the water supplemented by the oxygen given off from the plants, provides sufficient oxygen in the water to support the life of the fish in the aquarium. The plants in giving off this life giving and water purifying oxygen, absorb harmful gases and carbon dioxide from the fish. It is the plants that keep the water fresh and clear, eliminating the necessity of changing the water in the aquarium.

Aquatic plants are the most important of the aquarium equipment and more than half the beauty. The natural beauty of aquatic plants serves as a pleasing background to enhance the exotic color of your fish.

Aquatic Plants need to be planted in "well-washed" aquarium gravel only; no soil is necessary. Gravel should be placed in the aquarium 2½ to 3 inches deep in the back, sloped to 2 inches deep in the front. Planting is done with the aquarium at least two thirds full of water. The roots of the plant should be gently pushed into the gravel and covered up to the crown, leaving the crown exposed. The arrangement of the plants in the aquarium is a matter of taste. Generally the taller plants are placed in the back with the smaller and more showy specimens towards the front. Plants require 8 to 10 hours of good light each day; they will grow equally well in sunlight or artificial light provided by an aquarium reflector.

We have listed in our catalog only those plants which we know from experience are best suited for growing in an aquarium. We are proud of our plants and consider them among the finest grown anywhere.

**CRYPTOCORYNE**—The plants in this group are particularly well suited to aquariums that receive subdued light. In our opinion they are to be considered with the most beautiful of the aquatic plants. All are strong rooted and hardy, distinctively different in color and shape.

**101 CRYPTOCORYNE CORDATA**—Broad heavy leaves, dark olive green, red underneath.  
35c each; Large 75c

**102 CRYPTOCORYNE BECKETTI**—Dwarf variety—bright green leaves, long roots, an ideal plant for small aquariums.  
25c each; Large 50c

**103 CRYPTOCORYNE GRIFFITHI**—The most beautiful of the Cryptocorynes—Broad dark silken green leaves, red underneath. Long stemmed and rooted—very hardy.

# SCAVENGERS . . . for the Aquarium and Pool

AUSTRALIAN SNAIL

FOUR HORNED SNAIL

JAPANESE SNAIL

POND SNAIL

RED RAMSHORN SNAIL

BLACK RAMSHORN SNAIL

Be sure to have some scavengers in your aquarium. Scavengers consume the excrements of the fish, in fact any and all refuse which they find in the aquarium, and thus keep the water clean and in excellent condition. Scavengers placed by themselves in an aquarium are very interesting to watch. The Japanese Snails bring forth their young alive. The Water Newts and Turtles, while not as useful as Scavengers, are very entertaining.

## AQUARIUM REFLECTORS

Aquarium plants require from 8 to 10 hours of good light every day. Aquarium reflectors are essential where natural light is not sufficient for plant growth.

Plants will grow equally as well under artificial light which may be substituted entirely for natural sunlight.

**NOTE:** Only Fluorescent type reflectors are equipped with bulbs. For all other style reflectors order bulbs separately. No. 1 and No. 2 Marble Finish, No. S.S. Reflectors are made with one socket for bulbs in 10" to 20". 24" reflectors have two sockets. No. 3 S.S. Reflectors 18" to 30" have two sockets. 36" has 3 sockets. No. 4 Green Reflectors 12" to 24" have one socket.

This small pump will handle either filtration or an air releaser. Mounted on rubber base, pump is 2 inches high, 4 inches long and 2 inches wide—metal case. Price **\$8.95.**

## WIL-NESS AIR PUMP

## WHY AN AIR PUMP?

The most important essential in maintaining an aquarium is "proper balance." This proper balance is sure to be maintained when the water is aerated and filtered by means of mechanical circulation. As a result of this the air surface of the water is increased as well as moving the water within the aquarium. As the water passes through the filter it is cleaned, all impurities and dirt removed, and freshly aerated water is returned to the aquarium. This means that the fish in your aquarium will be healthier and more colorful, they will live longer, grow larger, and breed more prolifically.

## THERMOSTATIC HEATER

A thermostatically controlled heater in a low price range for those aquarists who wish automatic heat control in one tank only. Thermostat and heater are held to side of aquarium by a non-corrosive metal holder. Elements are laboratory tested for efficient economical operation.

25 watts **\$3.95**  
40 watts **\$3.95**  
75 watts **\$4.50**  
100 watts **\$4.75**

A good heater and thermostat is a small expenditure that will more than pay for itself by the fish that didn't die. Since most aquarium fatalities are caused by temperature fluctuations, a heater in cold weather is practically a must. Automatically controlled heaters are perhaps the greatest benefit ever devised for the tropical aquarium. For a healthy aquarium the water should be maintained at a temperature of at least 70° F. For spawning egg layers or nursing sick fish the temperature should be gradually raised to 80° or 85° F.

**NOTE:** A heater without a thermostat is not automatic. It will operate continually as long as it is plugged in or the electricity turned on.

**All Heaters are guaranteed for one year—except against glass breakage.**

We recommend the following size heaters for your aquariums:

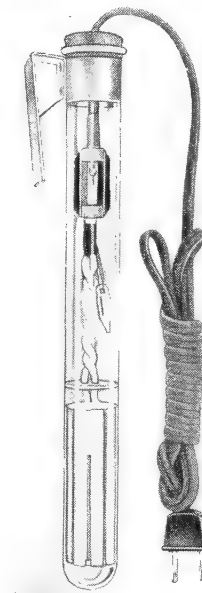

2 to 5 gallons Glo-Lite, 12½ watt or 15 watt  
5 to 10 gallons, 25 watts  
10 to 15 gallons, 50 watts  
15 to 20 gallons, 75 watts  
20 to 30 gallons, 75 to 100 watts  
30 gallons, 125 watts or more

We strongly advise using a thermostat and pilot light on all aquarium heaters; for safety and economy.

**No. 10. DELUXE SIMPLEX COMBINATION HEATER AND THERMOSTAT WITH BUILT IN AUTOMATIC PILOT LIGHT**

Here is heating efficiency at its best! Simple and space saving—easily concealed. Single Pyrex tube contains heater and thermostat—Radio and TV static eliminator—built in Pilot Light that "Glows" when heater is operating. Solid heating unit is practically everlasting and provides good bottom heat.

# GRAVEL GUARDS

Gravel guards, or food guards, are useful and ornamental. They assist in arrangement and show off aquarium plants and fish to better advantage. If gravel is placed higher in the back of the aquarium and sloped to the front most of the dirt and excess food will accumulate in front of the guard and may easily be siphoned off and removed.

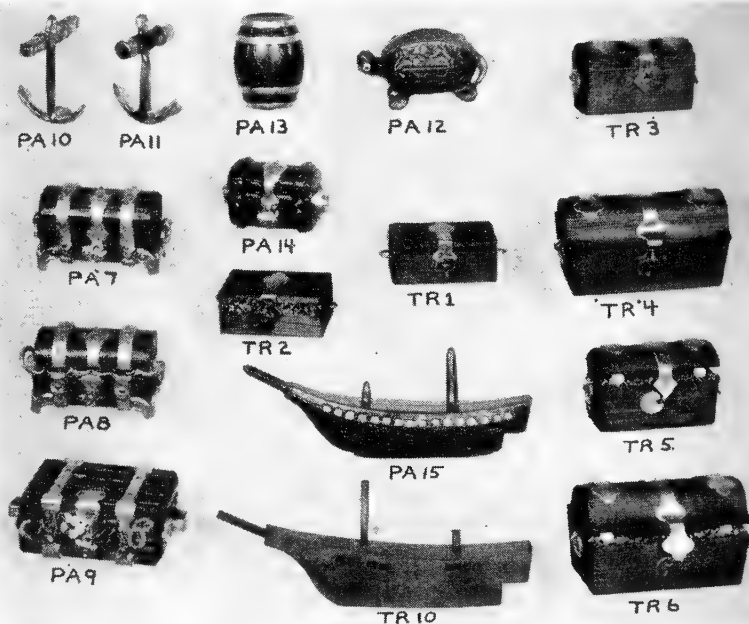

## SPECIAL DELUXE TERRACE GUARDS

(Illustrated in photo at left)

These 5-piece gravel guard sets are made for larger size "show tanks". The two terrace pieces that fit across the back are made to give two levels in the aquarium thus showing off all the plants to a better advantage. The three pieces across the front provide an open space for a feeding area. All are artistically hand made from natural rock and minerals that are not harmful to the aquarium.

## INDOOR GARDENING PROVIDES YEAR ROUND PLEASURE

To flower lovers and plant collectors—a terrarium, a window box, or a nicely planted piece of pottery serves as an outlet for gardening enthusiasm ordinarily curtailed by wintry weather. Decorators say, "It's not a home till it's planted." Indoors and out—plants and living decorations provide enjoyable relaxation as

well as added beauty everywhere in the home. We have done our best to grow and list in our catalog, unusual and decorative plants that will thrive under ordinary home conditions. We make no bold or exaggerated claims—we state simply, "We try to do our best—always."
